Printronix Auto ID Launches High Performance, T6000 Industrial Barcode Printer Series

BREA, Calif., September 21st, 2016 — [Printronix Auto ID, Inc.](#), a global leader in enterprise grade industrial printing solutions unveiled the T6000, its next generation of high-performance thermal barcode printers. Designed for the mid-range market, the T6000 is engineered for industrial applications such as manufacturing, automotive, transportation, retail, transport and logistics. Printronix Auto ID's new thermal barcode printer is loaded with advanced features, online data validation (ODV) technology and the industry's most comprehensive emulation package that allows for easy integration into any legacy environment.

The T6000 is built for speed, versatility, and reliability. With its 14 inches per second (ips) print speed producing quality barcode labels, RFID support for various applications, and Postscript/PDF for complex labeling requirements, this is a printer designed to boldly address businesses challenges such as performance and productivity.

Plamen Petkov, General Manager at Printronix Auto ID said, "These are exciting times at Printronix Auto ID. The T6000 represents another landmark in our team's commitment to push the envelope and once again set the benchmark for industrial printing solutions." Addressing the company's overall business strategy Petkov continued, "This product represents the next milestone of a robust product development pipeline we expect to complete over the next 18 months. The T6000 with an expanded set of features and models will allow us to broaden our market with new verticals and unique applications."

Printronix Auto ID T6000 Features & Benefits:

Speed:

- Clocking in at a true print speed of 14 inches per second while producing quality barcodes, the T6000 is engineered to increase productivity at every shift
- An interactive screen and intuitive control panel reduces downtime and streamlines operations

Versatility

- Easily integrates into any network environment with plug-and-play compatibility
- Handles a variety of applications with RFID support for On-Pitch, Short-Pitch and Standard pitch

Reliability

- Exclusive online data validation solution produces 100% accurate barcodes that eliminate expensive compliance fees
- Expansive WiFi Security Protocol as well as integration of Security Certificates is designed to protect enterprise environments.

“It’s really exciting to introduce the T6000 series,” said David Hawkes, Senior Product manager for Printronix Auto ID, Inc., “because the market has been asking for a printing solution with new innovative technology. The maximum speed of the T6000 isn’t just a spec, it can actually print usable and valid barcodes at 14 ips. That allows the printer to be more productive and end users more profitable. Add the versatility of RFID and reliability of our Online Data Validation, and the T6000 becomes the “printer-of-choice” for a huge market segment.”
